Top 4 Reasons Veterinarians Across Canada Choose Medna Medical Equipment.

1. The “Medna Customer Bill of Rights” (See Page 32 Now for Full Details!)
2. Competitive Pricing, Expert Advice, Friendly Ongoing After Sale Support.
3. Medna is the Canadian Service Depot for 100% of the Products Represented (Avoid the Unnecessary, Frustrating, Service, Repair/Warranty Runaround).
4. No Cross-Border Nightmares... No Unexpected Customs Delays; No Costly Hidden Brokerage Fees
(Ask us for a cost breakdown comparison direct from USA).

Medna Represents The Top
Veterinary Equipment
Manufacturers & Suppliers
Across Canada

More Important Reasons Leading Veterinarians Across Canada Choose Medna

- Same Day Shipping even large capital items like X-Ray Dental Units, etc.,
- You start earning income from what you just paid for fast.
- Local Support - Offices in BC, Ontario Alberta and Ottawa.

Did You Know Medna Specializes In Everything X-Ray?

- New Clinic Design, Specific tions, Supply, Installation, Training, Support.
- HARP, RPS Surveys, Calibration, Repair.
- Digital Flat Panels, Service Repair Plus Maintenance Service Agreements.
- Canadian Compliant, Secure DICOM Cloud Backup System & Support.

NewTom 5G XL

ADVANCED 3D VETERINARY IMAGING

Outstanding quality and innovation, exceptional features.

NewTom 5G XL, a CBCT device incorporating unique technology, guarantees advanced top-level diagnostics by maximising patient stability and providing a broad selection of FOVs, resulting in 3D and 2D images of the very highest quality.

CBCT technology combines low X-ray doses with high spatial resolution: the outstanding quality of 5G XL images allows veterinary specialists to identify pathologies and fractures that would otherwise be unidentifiable. Patient health - enhanced by the ECO Dose mode and exclusive SafeBeam™ technology - is a key design priority.

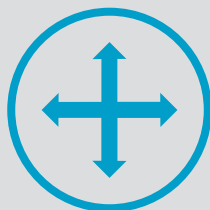

The native 21 x 19 cm FOV and numerous smaller high resolution FOVs constitute a toolbox that is perfect for veterinary diagnostics, which demand sharp and extremely detailed images.

SUPERIOR DIAGNOSTIC QUALITY

Superior standard
3D examinations
with a device
designed for excellent
performance.

Ultra-high definition volumetric images with native isotropic voxel resolution and minimal artifact presence. Thanks to CBCT technology, 5G XL offers fast scanning and extremely contained X-ray doses, increasing safety for both operator and patient and ensuring a more efficient workflow.

The outstanding versatility of 5G XL makes it the perfect device for otorhinolaryngological and muscular-skeletal diagnoses, with or without radiocontrast agents, for complete upper airway analysis and for the investigation of dental and maxillofacial pathologies.

COMBINING TECHNOLOGY, PERFORMANCE AND SAFETY

5G XL offers outstanding results with low radiation doses for the patient, all thanks to undeniable constructive excellence:

The X-ray generator, the only one of its kind in the world, with rotating anode and a 0.3 mm focal spot, optimises performance by adapting emissions to the specific needs of the examination. It also provides high filtration levels to protect the animal from more harmful radiation types.

The large Flat Panel sensor with high signal-noise ratio improves final image quality, while collimation limits exposure to the specific regions of interest.

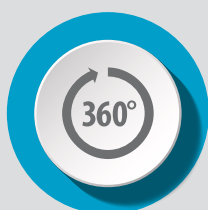

Innovative volumetric reconstruction algorithms allow the user to control the image chain and maximise diagnostic potential while minimising the presence of artifacts.

MOTOR-DRIVEN PATIENT TABLE.

The NewTom 5G XL is characterised by a motor-driven, carbon fibre patient table. Controlled via a panel on the machine, it ensures comfortable, easy access to the gantry for operator and patient alike.

Motor-driven table control is even easier when performed via the PC as it allows the user to adjust patient positioning directly from the workstation. The open gantry makes access to the scan area easy and simplifies, along with the three reference lasers, the management of initial patient positioning (dorsal, ventral, rostral, cranio-caudal or caudo-cranial).

Skanc C VET

High Frequency Veterinary Mobile Surgical C-Arm

Ask Us

Mobile, High-Frequency Surgical C-Arm with 2.2kW Monoblock, 9" Tri-Mode Image Intensifier, kV Range of 40-110kV, 10.4" Touch-Screen Console with Image Adjustment Features, On-Board Storage For Up to 100,000 Images, 1k x 1k High Resolution Camera, Road Mapping & DSA (Standard), Laser Aimer, DICOM 3.0 with PACs integration, Dual 18" High Contrast Monitors and Sleek On Board Keyboard.

Radiation:

- *Safest C-arm in its class with near zero leakage radiation
- *Lower dosage with excellent image quality

Generator:

- *High-performance generator with up to 250kHz switching frequency

- *Customized and in-house developed X-ray tube

Modes:

- *Pulse mode for a lower dosage
- *DSA & Roadmap comes as a standard feature

Service support:

- *Best-in-the-industry warranty terms

- *Remote diagnostics capability

Low dosage patient positioning:

- *Virtual collimation for ROI selection w/o X-ray

- *Laser Aimer for initial patient positioning

Workstation capability:

- *More than 100k images storage

- *DICOM 3 compatible; PACS integration

2*-hour inbuilt power back-up

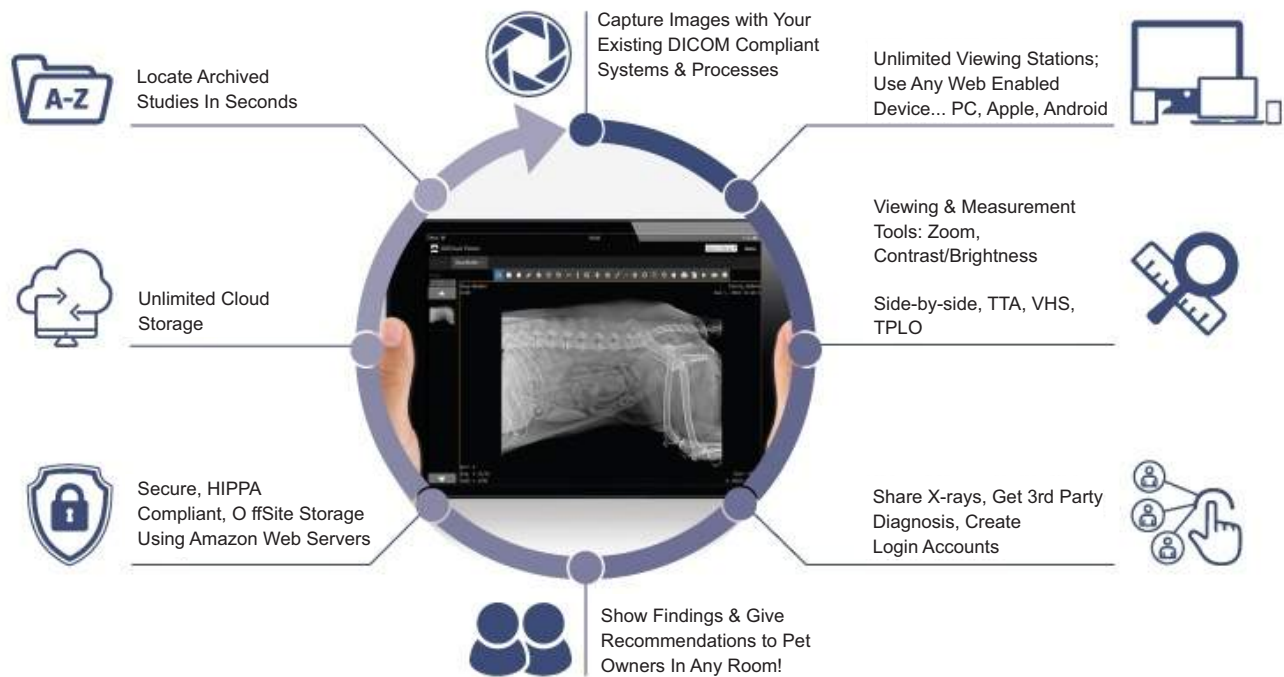

- *Upgradable option for wifi capability for PACS

- *Upgradable option for external monitor

+ Web PACS CaptureX Unlimited Viewers

Reasons Why Veterinary Clinics Love Using The Medna Web PACS Solution:

- . Easy to Use

Dental X-Ray

Affordable & High-Quality DC Dental X-Ray Systems

DCX7000 Series Dental X-ray (Wall-mount & Mobile)
Introducing a power pack and intelligent HF dental system

Advanced dual microprocessor system + High Frequency DC system

- 0.4 mm focal point , Low dosage.
- Sharp and crisp image quality X-Ray.
- Fully digital-programmable operation.
- Perfect clinical and patient experience.

Flexible Exposure System

- Triggers from distance with no-shift image position.
- Ease of movement and flexible.
- Availability of three scissors arms sizes.

30 Pre-programmed techniques

- Enhancing doctor's experience and flexibility.
- Exclusive LCD display.
- Streamline setting for individual.

WE BELIEVE IN GREEN so as our system

- Clean power withdrawal while on stand by.
- Energy consumption negligible.
- Energy conservation with shorter exposure times

DCX9000 Series Dental X-ray (Portable)

Redefining the whole portable experience with ease of movement,
Safe,
Lightweight, Quick transport, Ergonomic design & Convenient to use

Single unit with Multi features

Longest Battery life in the market, Up to 800 Exposures

- 0.4 mm focal point , Super sharp output
- Dual radiation protection with Max weight of 3.0 Kg.
- Internal shielding & External backscatter shield.
- Fully digital-programmable operation.
- Fast exposure system,X-Ray field of 60mm diameter.
- FDA ,CE and Health Canada Approved.

REDEFINING INTRAORAL SENSOR

FHDX1000 (size #1), FHDX2000 (size #2) & FHDX4000 (size #4)

- Specifically designed for veterinary use
- Fiber optic plate with over 2m cable length.
- Waterproof, can be immersed in disinfectant liquid.
- Sleek CMOS sensor adjustable for every patient comfort.
- High Resolution + High Sensitivity = Accurate Diagnosis.
- Cutting Edge Image processing.
- Optimum and crystal clear image quality.
- Powerful imaging software ,3sec image transfer.
- Enhanced image quality, fully DICOM, Export with the option of cloud-view and storage.
- lifetime software support (manufacturer limited)

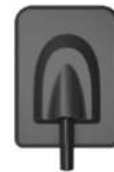

Mobile Unit

Wall Mount

Portable

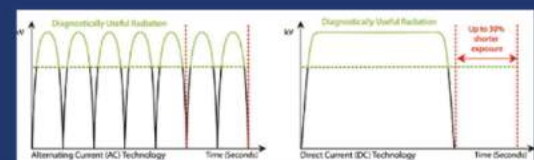

FHDX2000 (size #2) FHDX1000 (size #1)

Buy a Wall Mount or Mobile Unit with the Digital Intraoral Sensor and

SAVE \$500

Why
Choose
DC?

DC units produce a more consistent x-ray output which allows for shorter exposure times and take quality images consistently, compared to AC machines.

Canadian
Serviced

Support
and
Training

- High speed, multi-function veterinary dental unit.
- All-in-one unit lets you easily switch from polishing to scaling to cutting.
- Surgical stainless steel, heat treated tips glide smoothly across tooth surfaces.
- Optional, fiber optics system with high-speed hand piece.
- Tips gently cool and lubricate teeth, and wash away dislodged debris
- Built-in 25K ultrasonic scaler maintains optimum frequency.

Accessories & Maintenance Kits

Looking for a dental unit Maintenance Kit? Look no further we have maintenance kits for your Sonus V, Son-Mate II, Scale-Aire & Scale-Aire Mini's.

- Choose from: Basic - Deluxe packages.
- Spray Lubricants, One-Step conditioners, Drop Oil, Water Filtration Bottles, Cleaning Brushes, Prophy Angels & Bur Kits.
- Not seeing what you need? Contact us we will find it for you.

Dental Scaler

- Water line with filter and quick disconnect.
- Perform curettage & deep curettage.
- Scale heavy calculus and remove stains.
- Transducer (stack) inserted in the hand piece.

Scale -Aire Mini

- A powerful and potent tool against periodontal disease.
- Connects to a nitrogen tank easily.
- Water flows internally through the tip directly to the operative site, gently cooling and lubricating the tooth, washing away the dislodged debris.

Son-Mate II

- From 200 RPM high torque micro-motor with forward/reverse switch.
- One foot control for both scaling/polishing modes.
- Includes a scaler hand piece with an inserted stack (transducer), assorted tips and a tip wrench.

Oxygen Concentrators

Nuvo Lite / 5

- Best for offices with only one anesthesia machine
- Years of trouble free operation
- Can be mounted on some gas machine carts
- Lockable control flow valve

Oxygen Concentration	90% (+6.5%/ -3%) at 5 LPM
Liter Flow:	0.125 to 5 LPM
Sound Level:	45 dBA typical
Outlet Pressure:	7.0 PSI
Weight:	32lbs/ 14.5kg
Dimensions:	14"Wx9" Dx23" H

Available Accessories:

- Mounting Bracket

Nuvo 8/10

- Best for large practices
- Can accommodate up to 3 Anesthesia Machines
- Can be used with Oxygen therapy systems
- Oxygen supply for the whole clinic

Oxygen Concentration	90% (+5%/ -3%) at 8 LPM
Liter Flow:	2 to 8 LPM
Sound Level:	48 dBA typical
Outlet Pressure:	15 PSIG
Weight:	55.5lbs/ 25.2kg
Dimensions:	16"Wx16" Dx28" H

Ultrasound

Vetus E7

Hand-Carried Veterinary Ultrasound System

Since its founding, Mindray Animal Medical has been dedicated to developing innovative and accessible ultrasound solutions for the animal care environment. It is this commitment to excellence that has brought you ZONE Sonography® Technology+ (ZST+), evolving industrial designs and comprehensive disinfection solutions. The Vetus E7 Ultrasound System has been thoughtfully designed to overcome the obstacles clinicians face in today's challenging healthcare environment. With a sealed user interface design and revolutionary, software-based beamformer technology, ZST+, the Vetus E7 System combines best-in-class image quality with an intuitive user experience to help ensure reliable and efficient diagnosis during the most challenging exams

DP-50 Vet

With its streamlined features and compact design, the DP-50 Vet Ultrasound System is the ideal solution for a mobile veterinary environment. The System's powerful engine and high-speed processing provide outstanding image quality and a complete information management solution. For veterinarians seeking improved ergonomics and innovative ultrasound technologies, the DP-50 Vet is an excellent choice for providing high-quality care

Z60 Vet

The Z60 Vet Ultrasound System is a comprehensive choice for veterinarians seeking innovative and high-performing ultrasound technology. A compact System, the Z60 Vet combines unsurpassed image quality with ease-of-use, and practical functionality, while meeting the financial goals of any practice.

M6 Vet

Intelligent Workflow

- iTouch™: Intelligent image optimization for B, color and PW mode
- Smart Tracking: Continuously track the color flow and optimize the best color box in real time scanning
- Smart Doppler: Automatic optimize the size and position of color box and doppler gate placement to ensure optimal signal color and spectral doppler sampling

Comprehensive Functionalities

- iScan™: real-time panoramic imaging with velocity indicator, a very useful tool to evaluate the racing horse tendon
- Free Xros™ Imaging: Anatomical M mode, it can support EF measure offline and significantly shorten the exam time
- Advanced cardiac function assessment packages including Free Xros™ CM Imaging: Anatomical Curved M mode and

Professional Design for Veterinary Use

- Veterinary information management tool for more than 6 types of animals
- Up to 22 veterinary body marks
- Abdomen, cardiac, OB, vascular, small parts and MSK exam modes and analysis packages for different animals
- Veterinary OB table
- User-defined formulas for more applications

M9 Vet

Dedicated Veterinary Software

- Data information
- Exam modes
- Bodymarks
- Measurements and reports

Advanced Features

- High quality CW imaging
- TDI and quantitative analysis for confident cardiology analysis
- Tissue Tracking quantitative analysis for advanced myocardial study
- Auto measurement including Auto PW trace, Auto EF etc.

Pumps

EN-V5 Infusion

- 4.3 inch color touch screen, parameter setting and editing directly
- Uses any standard IV sets and stores no less than 2000 drugs in library
- Multi-function operation with 5 infusion/inclusion modes
- Infusion rates range from 0.1 to 2000ml/h
- Last therapy for rapid infusion start
- 10 hours battery back-up with Lithium polymer battery 11.1V/2600 mAh
- IP44 waterproof

EN-V7P Infusion

- 4.3 inch color touch screen, parameter setting and editing directly
- Uses any standard IV sets and stores no less than 30 drugs in library
- Multi-function operation with 3 modes
- Electric door and anti-free flow clip patented design
- Double CPU for increased safety, Ultrasonic air-in-line detector
- Historic record more than 5000 logs
- 9 hours battery back-up with Lithium polymer battery 11.1V/2600 mAh
- IP24 waterproof, and stackable design

EN-S7P Syringe

- 4.3 inch color touch screen, parameter setting and editing directly
- Automatic recognition of syringe sizes (5, 10, 20, 30 and 50/60)
- Stores no less than 30 drugs in library
- Multi-function operation with 3 modes
- KVO range from 0.01 to 5ml/h, editable
- History record more than 5000 logs
- 12 hours battery back-up with Lithium polymer battery 11.1V/2600 mAh
- IP24 waterproof, and stackable design

VV-100 Vein Viewer

- Easy to operate
- Accurate imaging
- Three operating modes

Tubing set

- Optimally deliver IV fluids, TPN solutions, blood and blood products with a +/- 3% accuracy.
- All control-V IV pumps are now calibrated to this tubing in channel 1.
- 103", 20 drops/ml, dual injection ports, rotating luer lock.
- 50 IV tubing sets/cases.

IV Stands

Autoclaves

Clave23+ with Compressor Class S Autoclave, Non-Vacuum

Full automatic autoclave with LCD displaying, independent steam generator, Independent temperature and pressure monitoring, higher precision control System, automatic alarm for water level, door locking and error code Indicated. *Includes Built in Printer and Datalogger
of Trays: 4 trays (standard equipped), max 5 trays

Chamber Size	F9.72"X17.7" (23L)
Overall Size	18.9"(W) x 18.3"(H) x 27.6"(D) (23L)
Nominal power	1600W
Voltage	110VAC - 60Hz

Tuttnauer Manual Autoclaves

- Automatic shut off at the end of both sterilization and dry cycles.
- A long life electro polished Stainless Steel chamber and door.
- Double safety locking device prevents door from opening while chamber is pressurized
- Drain valve is located on the front, allowing for quick and easy draining of water reservoir.

	10M	9M
Chamber Size	10"x18"	9"x18"
Volume	6gal/23L	5gal/19L

Centrifuges

E8 Digital

The E8 Fixed is designed for blood separations at a fixed speed of 3500 rpm only (1534 g-force). The E8 Digital will separate blood at 3500 rpm and can be slowed to separate other fluids at lower g-force, such as urine specimens as outlined by C.L.I.A. regulations.

Best
Seller

E8 Combination

The E8 Combination Centrifuge is specifically designed to run 75mm microhematocrit tubes and 1ml-15ml micro tubes and test tubes. This centrifuge features a quiet operation for a more peaceful laboratory environment. ing speed function for precision results.

E8 Portafuge

The portable E8 Portafuge is designed for spinning on the go. This model is loaded with features and improvements, such as higher speeds for faster and cleaner separations, quieter operation, lower chamber temperatures for cooler test-tube samples, and auto-calibrating function for precision speeds.

We carry a full line of Centrifuge, for more models please contact us!

Warmers

Wild Cat Warmer

Compact unit delivers powerful, accurate warming while taking up minimal workspace in your facility. It has a large crisp display & is lightweight which is ideal for transport

- Less than 10 pounds
- Temperature sensing hose-end helps to deliver accurate air temperature every time.
- Four standard one-touch temperature selections: Ambient, 32°, 38°, 43°

Bedjet Warmer

A set of 3 different reusable, machine washable warming blankets are included making it by far the best value on the market.

- Remote control
- Adjust from anywhere
- Weighs 13.8lbs
- Super Quiet Operation

HTP-1500 Warmer

The HTP-1500 is the safest and most accurate localized heat therapy system available. Its easy-to-read display provides continuous real-time temperature readings. The digital controller uses proprietary software to manage your prescribed set-point temperature to within one-degree Celsius (1.0°C)!* Three temperature safety limits guard against the possibility of overheating and the Hi Limit Switches can be tested without taking the unit apart! The HTP-1500 is also Mercury Free and uses Tap Water!

Cages & Kennels

All Styles of Regal Cages and Designed with these Quality Features:

Doors Stainless steel door spokes are deburred smooth to eliminate sharp ends. Stainless steel, electropolished removable ambidextrous door may be remounted with hinges on the right side. Door extends below cage floor to help keep paper liners in place. Door fits snug to the cage body to eliminate areas where an animal's paws could be pinched. 1.875-in. (.48cm) diameter stainless steel vertical spokes are spaced 1-in. apart and welded at every intersection to crossmembers and frame. 3.125-in. (.79cm) diameter stainless steel door frame and crossmembers are welded together for strength.

Hinges 3.125-in. (.79cm) diameter stainless steel hinge pins allow easy removal of door. Heavy 12-gauge stainless steel deformed barrel hinges operate smoothly for the life of the cage.

Hardware Stainless Steel installation hardware is the strongest available. Vertical molding strips and 14-gauge bolt corner plates mount easily with .250-20 stainless steel truss-head machine screws.

Latch Stainless Steel Latch easily disassembles for sanitizing and adjusting. .3125-in. (.79cm) diameter stainless steel latch keeper latches door securely. Heavy 12-gauge stainless steel latch brackets. Latch connector bar is notched for easy opening. Heavy 12-gauge stainless steel self-latching door latch connector is designed to accommodate a padlock for greater security.

Body 22-gauge Type 304 stainless steel body is hell-arc welded into one piece to create the strongest cage available. .750 in. (1.90cm) coved rear corners on top and bottom eliminate accumulation of dirt and bacteria. .750-in. (1.90cm) radius bends on all sides and back provides a smooth, easy-to clean interior surface. Distinctive floor design with fluid-retaining front lip is standard on all Regal Cages. Bottom lip overlaps lower cage when used in a Regal Cage arrangement.

Frame 18-gauge stainless steel die-formed floor support brace keeps floor rigid for animal comfort. 18-gauge stainless steel die-formed rear support keeps cage level. Hidden 18-gauge stainless steel die-formed front frame makes the front of the cage extra strong.

Customer's Bill of Rights

Medna Medical is proud abide by the Medna Customer's Bill of Rights for the Veterinarian Industry which Protects our customers from any negative experience they might otherwise have from other veterinarian supply companies:

- 1 We will treat our customers the way we would like ourselves to be treated, like family!
- 2 We guarantee our customers will receive honest and ethical advice, service and pricing.
- 3 The customer's best interest always take precedence in any intransaction with Medna , and the customer is always right.
- 4 We will clearly explain the pros and cons of all options presented so the customer can make a wise, informed decision.
- 5 We will deliver on 100% of our promises. If we can not follow through on a commitment, we will not promise what we can not deliver!
- 6 The customer will always receive prompt communication from their representative.
- 7 Clear expectations will always be set and agreed upon by the customer and representative, to avoid misunderstandings and unnecessary problems.
- 8 All quotes will clearly state all prices and fees up front-protecting you from surprise costs like shipping, installation, duties, brokerage fees, and price changes.
- 9 Service vehicles will be fully stocked with the necessary diagnostic and repair equipment ensuring the quickest repair and shortest service times possible.
- 10 We will protect our customers with the best warranties in our industry.
- 11 We will invest in the most advanced equipment in our industry to ensure our customers get best and fastest service possible.
- 12 Our technicians will have no less than 5 years-experience before working in the fieldfor our customers.
- 13 We will always remember to quote on all items required to have you purchase work as you expect it to do.
