Medna
Medical Equipment Inc.

With its streamlined features and compact design, the DP-50 Vet Ultrasound System is the ideal solution for a mobile veterinary environment. The System's powerful engine and high-speed processing provide outstanding image quality and a complete information management solution. For veterinarians seeking improved ergonomics and innovative ultrasound technologies, the DP-50 Vet is an excellent choice for providing high-quality care.

Performance. Flexibility. Mobility.

Exceptional ergonomics

The DP-50 Vet has a sleek, lightweight frame and is equipped with a 15" high-resolution LCD monitor with tilt functionality for better viewing.

Advanced imaging

Scan with confidence using leading-edge technologies like:

- **iTouch™ Auto Image Optimization** to quickly optimize image uniformity and dynamic range
- **iClear™ Speckle Reduction Adaptive Image Processing** to improve image quality based on auto structure detection
- **Phase Shift Harmonic Imaging™ (PSHI)** to enhance contrast resolution and improve image quality

Intelligent workflow

The DP-50 Vet System features workflow enhancements like one-click image save and transfer to local server or USB, and onboard reporting. The System is also DICOM 3.0 compliant to increase efficiency while maintaining positive four-legged patient outcomes.
